- Completion:** December 2019

On 13th December, within 4 weeks of work, the Royal Tent Company have completed a major project in the Russian city of Stavropol – constructing a beautiful ice rink under the vast tent cover taking over 2,100 square meters in space. It is the first arched tent with a width of 28 meters constructed in the world. Arched modules have allowed the complex to be separated on multiple zones, including technical service, locker rooms, food-court and the welcome zone. The complex itself has received major outdoor and indoor decorations and lighting.

After the public opening on 13th December, it was met excellently by the citizens of the city and became the most popular leisure destination.
